

Smart and Secure Solutions for PHI Exchange

Establishing flexible, scalable, and agile clinical workflows is critical for coordinating patient care, enhancing public health reporting, and improving patient and community outcomes. Equally important is ensuring the security and accessibility of PHI exchanged across endpoints.

SOLUTIONS

DataMotion offers a suite of solutions to facilitate data exchange between providers, payers, patients and health IT vendors that can rapidly scale to enable the exchange of millions of messages a day. Built on the DataMotion Platform, these solutions leverage a zero-trust design and military-grade encryption for security and compliance as well as providing flexible solution options ranging from patient exchanges to nationwide public health reporting.

SECURE MESSAGE CENTER KEY FEATURES

- Offers integration with Direct Secure Messaging and FHIR.
- Uses APIs, no-code web components and other connectors to embed secure data exchange into clinical, payer and administrative workflows.
- Integrates with clinical applications run by providers and payers along with back-end systems including contact centers and CRM solutions.
- Provides a secure platform for exchanging patient information, lab results and other PHI

DIRECT SECURE MESSAGING KEY FEATURES:

- Easily connects with patient and provider applications, EHRs and other healthcare solutions
- Solutions are ONC Certified, DirectTrust™ HISP/CA/RA accredited and HITRUST CSF® certified
- 2.7 million DirectTrust addresses and over 5.3 million NPI addresses.
- Full lifecycle APIs for automated user management, reporting, and messaging

Organizations can also leverage solutions such as our secure file transfer, secure forms and secure email.

BUSINESS VALUE:

- **Ease of Use:** Integration into native applications, portals, and workflows creates a seamless user experience.
- **Transactional Throughput:** The DataMotion Platform is capable of exchanging millions of records per day, significantly cutting back on processing time.
- **Scalable and Flexible:** Customizable solutions, including low and no-code experiences, enable rapid scaling, from pilot to mission-critical for cloud-based deployments.
- **Ironclad Security:** Our zero-trust approach employs military-grade encryption.
- **Verifiable Compliance:** Messages are logged and tracked for compliance with regulations such as HIPAA, HITECH, and GDPR. Our Direct Secure Messaging is HITRUST, CSF® Certified and DirectTrust™ and EHNAC accredited.

“DataMotion Direct services are so transparent and easy to work with, none of our users even know they are there.”

ABOUT US

DataMotion enables organizations to leverage no-code and low-code experiences to quickly and efficiently integrate secure clinical exchange into their workflows. Our platform includes a wide range of RESTful APIs and standards-based protocols that seamlessly integrate disparate systems and applications. This allows clinical and back-office systems including EHRs, HIEs, mHealth apps, CRMs and Contact Centers to securely exchange sensitive data to support their customers, partners, and vendors using convenient secure digital methods.
